Alima Nur Begimbaeva

5468-8325 | alimanurb@gmail.com | Website | LinkedIn | GitHub

SKILLS

Technical Skills: Python (pandas, numpy, seaborn, PyTorch, TensorFlow, Sci-kit learn), HTML5, CSS3, JavaScript, PHP, SQL (MySQL), Excel (vlookup, pivot tables, data modeling, reporting), Tableau, Google Forms, Airtable, Weka, SPSS, KNIME, Cloud Computing, AWS Cloud, ArcGIS, MCP, Git, Web Design, FastAPI

Languages: English (Advanced), Korean (Intermediate), Russian (Fluent), Turkish (Fluent), Cantonese (Elementary), Mandarin (Elementary), Kyrgyz (Native), Japanese (Beginner)

Soft Skills: Adaptability, Curiosity, Discipline, Presentation, Teamwork, Time Management

EDUCATION

Lingnan University — Hong Kong S.A.R

Bachelor of Science in Data Science — Expected Graduation: May 2026 — *2022 – Present*

Minor in Environmental and Scientific Literacy — *cGPA: 3.44/4*

Relevant Coursework: Operation Simulations with Decision Making, Location Intelligence, Best Practices of Data Science, Web development for e-business, Data Mining, Applied Econometrics, Statistical Analysis, Scientific Literacy, Databases and Data warehouses, Machine Learning, Intro to AI

EXPERIENCE

ML Engineer Intern – Zeno Ltd. — Mar. 2026 – Present

Hong Kong S.A.R — *Hybrid*

- **Engineered** a production-ready AI agent using LangChain and Composio SDK, enabling natural-language control of Gmail and Google Calendar via MCP with 27 actions and robust error handling, decreasing manual integration effort by 80%
- **Led** the design and optimization of Prompify's landing page, utilizing prompt engineering to replace multi-step questions with click-based interactions, reducing user input time by 40% and lowering API costs by 25% while boosting engagement

Operations Lead – CantoNet Cultured Ltd. — Sep. 2025 – Present

Hong Kong S.A.R — *On-site*

- **Spearheaded** comprehensive analytics across 20+ operational datasets using Python (pandas, NumPy) and Tableau dashboards, resulting in 38% reach growth, 22% engagement lift, and a reduction in database duplicates from 6.2% to 1.1%.
- **Architected** complete database redesign with optimized entity relationships which reduced database duplicate record from 10% to 1.3% through data quality initiatives.
- **Managed** teams (10+ interns); implemented Google Sheets/Apps Script task systems reducing onboarding time 30% via permission matrices and automated workflows.

STEM and Tech Analyst – Campus X — Oct. 2025 – Present

Hong Kong, S.A.R — *On-site*

- **Delivered** workshops on AI route mapping and micro:bit programming, adapting data-driven lesson structures to reinforce programming concepts applicable to data analysis workflows
- **Instructed** variety of classes of 2-30 students from age groups 6-15, teaching micro:bit programming, robot assembly, 3D design, and Python/Jupyter Notebook coding to develop algorithmic thinking and technical problem-solving.

Operations Intern – Soap Cycling — Jan. 2024 – Apr. 2024

Hong Kong S.A.R — *Hybrid*

- **Streamlined** data accuracy and accessibility by inputting and organizing datasets of over 50,000 records using AirTable, improving database management practices.
- **Designed and administered** complex surveys to gather project-specific data; performed detailed data analysis and presented findings and actionable insights to supervisors.

PROJECTS

Echo Chamber in Reddit Vaccine Myths | *Python, VADER, NetworkX, Louvain, Matplotlib* 2025

- Conducted advanced data mining analysis on 1,602 posts from Reddit's r/VaccineMyths dataset; applied sentiment analysis and machine learning techniques (**VADER, LDA, Louvain** clustering) to identify misinformation patterns and network topology.
- Discovered 2 distinct high-negativity echo chambers with **65–70% negative sentiment** and minimal variance ($\sigma<0.2$), revealing reinforced misinformation feedback loops; created network visualizations using **Matplotlib** and **NetworkX** to map conspiracy theme propagation.
- **Business Application:** Identified actionable targeting strategies for social listening platforms and content moderation—applicable to brand monitoring, risk management, and early intervention algorithms.

Mixingo | *Next.js, FastAPI, GPT-4o-mini, Python, Tailwind, Vercel* 2026

- Built an adaptive learning platform that **reduces redundant studying by 32%** using GPT-4o-mini for real-time quiz generation based on warm-up performance and language background.
- Architected **full-stack solution** with Next.js frontend, FastAPI backend (RESTful API, Pydantic validation), and deployed on Vercel & Railway.
- Business Application: Demonstrates practical **AI integration for personalised education –** applicable to e-learning platforms, corporate training, and adaptive content delivery systems.

View GitHub

LinkGen | *React Native, Firebase (Auth, Firestore, Storage), JavaScript, i18n* 2026

- Developed a **mobile app** to combat elderly loneliness in Hong Kong, **connecting elderly users with volunteers** through real-time chat, event posting, and role-based access (elderly / volunteer / admin).
- Implemented full **i18n support (English, Tradition and Simplified Chinese)** and managed state with React Context; tested on both iOS and Android simulators.
- Business Application: **Scalable social impact solution** applicable to community engagement platforms, non-profit volunteer management, and telehealth companion services.

CERTIFICATIONS

AXA Climate School, Mandatory Training Issued: Apr 2025

- Skills: Sustainability Awareness, Climate Transition Fundamentals, Environmental Risk Assessment, Corporate Social Responsibility (CSR), Climate Change Adaptation, Green Finance Principles, Sustainable Business Practices

AWS, Cloud Computing 101 Issued: May 2025

- Skills: Cloud Concepts, AWS Core Services (EC2, S3, RDS), Cloud Security fundamentals, IaaS, PaaS, Cloud Scalability, Serverless Computing

ADDITIONAL

Availability

- Available for full-time positions upon graduation and completing my internship in September 2026
